

Talking Points

TOPIC: talking about names of angles — what does your group think?

A / D / U

- 1) $\angle 2$ is also called $\angle ELM$
- 2) If \overline{EO} bisects $\angle GEM$, then $\angle GEO \cong \angle OEM$.
- 3) $\angle 3$ is also called $\angle EMO$.
- 4) $\angle 5$ is also called $\angle EOM$.
- 5) $\angle QME$ is also called $\angle 4$.
- 6) $\angle QMG$ is also called $\angle 7$.
- 7) $\angle GOM$ is a straight angle.
- 8) $m\angle QLO + m\angle OLM = 180$.
- 9) $m\angle GOL + m\angle EOM = 180$.
- 10) $\angle GOE$ is also called $\angle 5$.
- 11) $\angle 9$ is also called $\angle OMQ$.
- 12) $\angle MEL$ is also called $\angle ELM$.
- 13) $\angle LEM$, $\angle LME$, and $\angle ELM$ are the three angles of triangle ELM .
- 14) $m\angle EMQ + m\angle QMG = m\angle GME$.
- 15) $m\angle MQG + m\angle MQE = m\angle EQG$.
